

Roxborough Park Vehicle policies

General rules of the road apply to all staff who will drive any Roxborough park vehicles. All vehicles are equipped with back up cameras and reverse beepers. They also have vehicle trackers in place to monitor speed and vehicles performance and tracking capabilities. All vehicles are equipped with emergency beacons on top, larger trucks also have tailgate lighting.

- Seat belts must be worn at all times for both drivers and passengers
- Speed limits are strictly enforced through out the park and while off property as well
- No tolerance policy for any type of violations while driving Roxborough park vehicles
- Vehicle backing while plowing snow is to back no more than 6 ft before moving forward, then wait for the camera to load before moving
- All drivers are to be trained before they begin plowing (drivers spend the first three storms riding along and then after 1st ride with supervisor)

Safety with all vehicles is the utmost importance of all staff employed here at Roxborough park. I have hereby read and will follow all rules set forth by Roxborough Park Foundation
